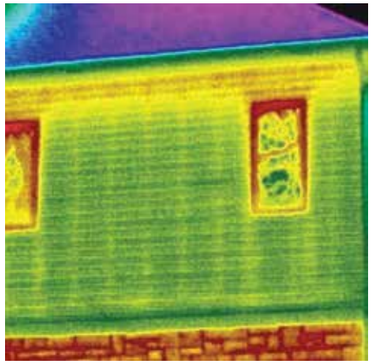
Haven's EPS foam helps it insulate better than fiber cement, wood, engineered wood or brick. So it has what it takes to keep your home quiet and conquer harsh climates. And it's super durable, which keeps you from spending precious time painting or thinking about siding that warps, buckles or sags.

- **Never needs painting**
- **Virtually maintenance free**
- **Helps keep moisture out**
- **Reduces noise by up to 45%**
- **Surprisingly green**
- **Industry-leading Double Lifetime Warranty**

CERTIFICATION PROGRAM

KEEP HEAT WHERE IT BELONGS
INSIDE YOUR HOME.

There's a phenomenon called "thermal bridging," in which heat and energy escape through the studs of your home's walls. Haven® Insulated Siding is engineered to dramatically reduce it. The illustrations below give you a good picture of how this all works.



WITHOUT HAVEN
Framing studs are not insulated, which means heat escapes through them from your home. The yellow area shows how heat transfers through the studs.

WITH HAVEN
Haven, shown in blue, cuts down on the energy you lose through the studs of your home's walls.

DEEPEN DESIGN WITH COLOUR.

Colour is crucial to how your siding presents itself. So we pay a lot of attention to what's trending and what works. Choosing your own colours can be fun, but a bit overwhelming. So we created a colour combination tool to help. Get ideas and tips at **royalbuildingproducts.com/color-style/royal-color-combinations**.

We develop our wide range of colours to fully express design when they're fresh, and years down the road, engineering our siding pigments to deliver vibrant curb appeal, resist fade and fend off elements day after day.

- **Our proprietary Chromatix® technology colour protection effortlessly maintains the look you create in a challenging outdoor environment.**
- **Infrared-reflecting pigments reduce heat buildup**
- **UV formulation with mineral-based pigments keep siding colours from fading**
