

# Stay smart with TYPAR® Flashing BA.

Backed with TYPAR® HouseWrap, TYPAR Flashing BA adds even more integrity to the building envelope when used as part of the complete TYPAR® Weather Protection System. This non-staining butyl adhesive flashing is excellent for warm climate applications and traditional building seasons.

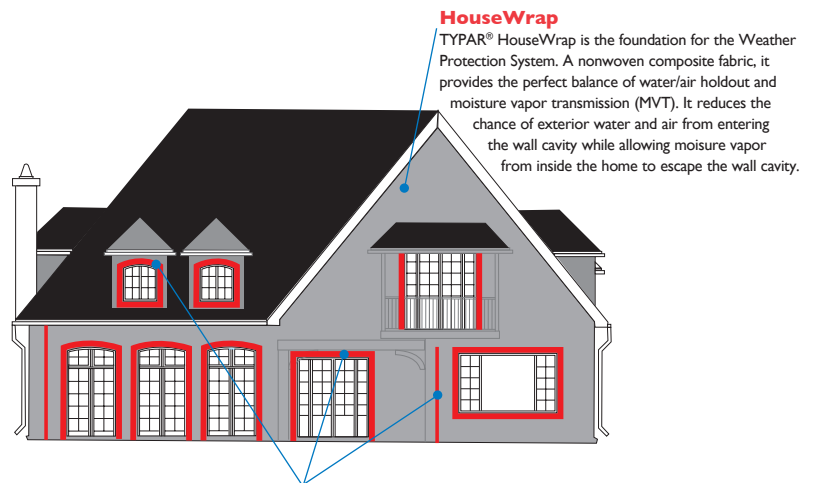

TYPAR Flashing BA forms a strong bond to TYPAR HouseWrap and other building substrates, and actually strengthens over time. It is repositionable too, so readjusting your initial placement is easy. TYPAR Flashing BA is ideal for use on straight jambs and heads of windows and doors.

Typar Flashing BA delivers these powerful advantages:

- **Exceptional air and water holdout** — backed with TYPAR HouseWrap, TYPAR Flashing BA provides seamless protection against moisture both during and after construction, and effectively seals cracks and seams for energy efficiency.
- **Peel & stick backing** — repositionable product is easy to handle and install.
- **Cleaner application** — adhesive will not stain surfaces.
- **Long-lasting durability** — UV resistance up to 180 days, and long-term adhesion to a variety of surfaces.
- **Part of the TYPAR® Weather Protection System** — backed by our lifetime limited product warranty (for single-family residential applications) plus an incredible 10-year warranty on labor and materials (restrictions apply, see warranty for details).

## Part of the TYPAR Weather Protection System.

### HouseWrap

TYPAR® HouseWrap is the foundation for the Weather Protection System. A nonwoven composite fabric, it provides the perfect balance of water/air holdout and moisture vapor transmission (MVT). It reduces the chance of exterior water and air from entering the wall cavity while allowing moisture vapor from inside the home to escape the wall cavity.

### Accessories

TYPAR offers three flashing options to ensure seal integrity around doors, windows, and other exterior rough openings. TYPAR® Flashing RA offers affordable, best-in-class performance. TYPAR® Flashing BA is our premium butyl-based flashing. TYPAR® Flashing Flex is butyl-based and perfect for sealing around arched windows. TYPAR® Construction Tape is a strong, polypropylene film, coated with a powerful all-weather acrylic adhesive that seals out the elements.
